

human body, and the entire round of domestic duties—would not the same stimulus exist to lead Woman to honor her profession and to prepare herself for it, now excites her brothers to seek the liberal professions?

Why should woman seek the professions of man? Would it not be better to elevate and dignify her own? Is there not enough work for woman in her own profession? The Census shows that there are now over two millions of children who have no teachers at all, while there are probably as many more under the care of men who are far better qualified for their calling.

Four millions of children not taught at all, or taught by men less qualified than women for such duties! Here is work enough for a hundred thousand women, and yet nothing of the other departments of woman's profession.

These remarks are designed to direct attention to an effort now to be made by the ladies of this City, which aims at once to elevate woman's professions, and to educate the millions of neglected children of our country.

The details cannot now be presented. The aim all will appreciate. Wise and efficient women are engaged in carrying it forward, and the names of those selected as managers are pledges that the measures to be adopted will be both judicious and practical.

The Empire.

The result of the late popular election in France makes it certain that the decision of the French people is in favor, by an overwhelming majority of the new dynasty, and Louis Napoleon ascends the Imperial Throne of France, the second Emperor in fact but the third in name, under the title of Napoleon the Third. Napoleon Bonaparte was the first of this dynasty, having assumed the Imperial purple in 1804, and was crowned by Pope Pius VII, in Notre-Dame, on Sunday, the 2d of December, 1804. The son of the misfated alliance between Napoleon and the house of Austria, never ascended the throne of France, having been taken into the custody of his maternal relations, after the downfall of his father. What was his fate, and at the exact period of his death, is involved in obscurity. Many vague and strange reports have been circulated with respect to his severe and cruel confinement on the confines of Austria, and it is even asserted by some that he came to his death by violence, his enemies fearing that in the revolutions of time, France might, if she could not "call on the chief of her choice," at least call upon his son to lead her on the bright and fiery path of his father's glory. He is gone, and though the breath of suspicion sometimes whispers that the lineal descendant of Napoleon still fills his place and the throne of France, all we know is that the grand-son of Josephine, of her whom it has been said, "she was the star of Napoleon's destiny," now, by the acclamations of eight millions of voters, (we cannot say freemen) assumes the purple of that throne made illustrious by the prodigy of the 18th century.

This is the end we have foreseen for France since the incipency of her revolution in 1848. We have never believed her citizens capable of appreciating, far less of putting in effective operation the great principles of free Republican government. The habits, the manners, and the national peculiarities of her citizens, their volatile and fickle disposition, and above all, their want of training in the great principles of self-government have long since convinced us that her assumptions of Republican Government were but assumptions, and that it only wanted some master spirit to ride in the whirlwind and direct the storm, to guide her devious course back into the most successful of the harbor of despotism, whence she had embarked. Such a spirit has been found, for the present at least, in the person of her nephew or her magic-old, how long he will prove himself adequate to the task which he has assumed, is a problem which time alone can solve, though we frankly confess that he has, thus far, manifested more decided marks of "enduring ability" than we had supposed him capable of exhibiting.

What is to be the ultimate destiny of the French people is a more difficult problem still. They are more clearly not prepared for self-government now, will they ever become so, and if they do, what is to be their destiny?

While a cardinal principle of our free institutions declares all men by nature free and equal, yet it must be admitted by all, that we never find men in a state of nature. They are all more or less the creatures and the slaves of society, and hence, before a great principle like this can be expected to act practically, it becomes necessary to purify as it were, society, and to re-teach as it were, its members. How is this to be done in France? Our freedom came as the natural result of principles which had been openly acting for centuries. The same principles which worked our independence, had manifested themselves in the camps of the Saxons long ere they entered England, had acted at Runnymede, had deposed kings when they had proved unworthy the trust reposed in them, had deposed Charles and banished James, had crossed the main with our Pilgrim fathers and taken deep root on the rocks of Plymouth and the sands of Jamestown, had flourished and dwelt among us, had gathered firmness from continued oppression; and when in 1776 our fathers raised the flag of freedom, it was not to proclaim but to reaffirm the principles of our fatherland, and in the language of the Sicile, (a Paris paper) they "displaced only the authority which ruled them, the enfranchisement of domination." France can point to no such principle in her past history. All is dark and gloomy; a history of bondage and tyranny. She needs schooling, she needs enlightenment. Her masters must be taught what freedom is, ere they proclaim it, and as we had occasion long since to say, "her revolutions have proceeded rather from the perception of wrong than the appreciation of right," and until some means shall be devised for educating her masses in the practical workings of the principles of freedom, we much fear that she will continue to present to the world but the melancholy example of the comet's course, splendid but erratic still.

The Legislature of Illinois will meet on the 1st of January. It will be an interesting session. A United States Senator will have to be elected—Judge Douglas' term will expire on the 4th of March next. There will be also many important measures in relation to State printing, and the railroads now in the course of construction and those contemplated. There will be conflicting interests, and there will not easily be reconciled, and altogether, it will be a very bustling session.

Thomas E. Meagher has \$100, for each legislative adviser, and The Kerry has \$300.

Death of the Countess of Lovelace.

This lady—"a noble daughter" of the poet Lord Byron—whose name has been made familiar to our countrymen through the impassioned language addressed to her by her father, the 27th of November, expired on Saturday, the 27th of November, after a lingering illness of more than twelve months duration, at the town residence of her noble husband, in Great Cumberland-place. She was born in 1816, and like her illustrious parent, died before completing her 37th year. Writing to Mr. Murray from Venice, Feb. 21, 1819, Byron says—"I have a great love for little Ada, and I look forward to her as a pillar of my old age; should I ever reach that desolate period, which I hope not."

From Bologna, 7th June, 1819, he again writes—"I have no more of my little Ada, the Electress of my memory, but there will come a day of reckoning, even if I should not live to see it." From Haversham, 8th October, 1820—"If you turn over the pages of the Huntingdon peerage case, you will learn how common was the name of Ada under the Plantagenets. I found it in my own pedigree in the reigns of John and Henry. Pisa, 17th Nov., 1821—"I have to acknowledge the receipt of a book of Ada's hair, which is soft and pretty, and nearly as dark as mine was at twelve."

On the 3rd of July, 1835, the poet's daughter was united to Lord King, subsequently (in 1838) created Earl of Lovelace, a connection by which the lineage of John Locke was blended with that of Byron. Much of the interest which attaches to the daughters of Milton and Shakespeare was felt in the deceased lady, wherever the English language is spoken, and to a large circle of private friends her death will be a source of sincere sorrow. Highly gifted, and endowed with a large share of her father's temperance, she delighted in intellectual as well as in benevolent and kindly pursuits, one of her most intimate and prized confidants having been for many years that intelligent friend of female excellence, Mrs. Jameson. To that lady's pen we should refer the public for a true appreciation of her character.

Relative Force of Indigenous and Foreign Population.

The official returns of the late census exhibit a state of things different from what was supposed to exist in regard to the relative proportions between citizens of the United States of foreign and of domestic birth. Of the free inhabitants of the United States 17,736,792 are natives of its soil, and 2,210,828 were born in foreign countries. Of the total of 39,297 not being ascertained. Of the whole number 1,965,548 are residents of the free, and 245,310 of the slave States. It will be seen that the persons of foreign birth, form 11-06 per cent of the whole free population. The countries from which the largest portion are derived, are as follows:

Natives of Ireland	Nat. of Scotland	Nat. of Germany	Nat. of France	Nat. of Wales	Nat. of Prussia	Nat. of Austria	Nat. of Italy	Nat. of Sweden	Nat. of Denmark	Nat. of Norway	Nat. of Finland	Nat. of Poland	Nat. of Hungary	Nat. of Bohemia	Nat. of Moravia	Nat. of Silesia	Nat. of Pomerania	Nat. of Mecklenburg	Nat. of Brandenburg	Nat. of Prussia	Nat. of Saxony	Nat. of Hanover	Nat. of Brunswick	Nat.
